
Environmental Statement

SecureSeal Systems Ltd., | OEM Group Ltd.,

At SecureSeal Systems Ltd., we are always striving to do better: Better in our product designs to further assist environmental sustainability with new products for the logistics market; better in our production and assembly techniques to further improve the use of recyclable materials and methods of manufacture; and better within our own internal practice encouraging our employees to be mindful and proactive in their day-to-day working practice to reduce and eliminate single-use plastic wherever possible, to recycle when avoidance is not an option.

WASTE MINIMISATION: We try to minimise waste in our operations and business activities. We dispose of waste conscientiously and creatively by making “reduce/reuse/recycle” the standard operating procedure. We incorporate waste reduction into the design of products, programs, and facilities, reducing waste through innovative product development, supply chain management, and end-of-life recycling.

CARBON FOOTPRINT We do our utmost to keep our carbon footprint as light as possible. Most of our products are manufactured in the United Kingdom. Two of our resale products are manufactured in the United States.
